E-MAIL OUTSOURCING COMPANY ONCE AGAIN DELIVERS 12 MONTHS OF 100% SYSTEM UP-TIME

GMSI's infrastructure proves rock-solid during last 12 months for clients who need the most reliable E-Mail services

OVERLAND PARK, KANSAS (October 12th, 2006)-- Global Messaging Solutions, Inc. (GMSI) today announced that the company has once again delivered twelve consecutive months of 100% up-time to its virus/SPAM prevention gateway clients. As measured by third-party software applications, GMSI's E-Mail perimeter security gateway and disaster recovery system was fully operational and accessible 100% of the time during the twelve month period.

In an environment where E-Mail is the most critical means of business-to-business communications, organizations cannot afford to have their E-Mail systems inaccessible. Messages must be delivered reliably, securely and promptly. Unfortunately for many, E-Mail systems do fail for a myriad of reasons. GMSI is proud to offer the most reliable E-Mail services available that allow companies to focus on their business; not their E-Mail woes.

“This monumental measure of 100% up-time is clearly a result of GMSI's investment in top-notch engineers and the world's most reliable hardware, software and network connectivity,” stated William J. Brunkhardt, Chief Technology Strategist of GMSI. “Our wide array of rock-solid E-Mail solutions benefits businesses and organizations around the world who cannot afford a single minute of E-Mail downtime.”

Global Messaging Solutions, Inc. (GMSI) is an innovative MSP (Messaging Service Provider) based in Overland Park, Kansas that provides enterprise-class E-Mail and messaging services to businesses and organizations, ISPs, ASPs, CLECs, web portals, telecommunication carriers and wireless carriers. For more information, or to contact GMSI, visit the company's website at <http://www.gmsi1.com> or call +1.913.338.3000.
